VERTICAL PERSPECTIVES SINCE '97

E L E V A T E

YOUR PERSPECTIVE

Radical changes in your environment require new perspectives to continue to rise, enjoy the things you love and sometimes just stay sane. This year has shaken all assumptions about the world to their very core, and while playing in the snow may seem frivolous when the foundations of life seem to be cracking under the weight of global events, the mountain wilds are exactly where we find solace and inspiration for better days ahead. We have taken this time to reflect on how we can improve those adventures with better products and elevated every aspect of our goggle line for '21/22. **Step into our perspective on the wonders of winter.**

WE ARE ALL ZEAL

Zeal is defined as passion, and our passion for winter defines the Zeal family. To help us continually push the limits of our goggles' optics, we work with a dedicated family of powder purists to test our gear under the harshest conditions, day in and day out. To constantly elevate our products and help solve problems you never knew you had. We hope to see you out there this winter testing your Zeals and would love to hear your thoughts on social media, where you can find us at @zealoptics on most platforms.

CONNECT + PROTECT

Each winter snowfall is becoming less consistent and it's on all of us to do everything we can to ensure the health of our mountains and climate. Our goal is to not only protect the environment and public lands, but to connect people - whether it be the disadvantaged, at-risk youth or the next generation - to these places, instilling a love for the outdoors, and inspiring them to work and advocate for wild places, and continuing that cycle forward. Long live winter.

MEET THE ZEAL FAMILY AT [ZEALOPTICS.COM/COMMUNITY](https://zealoptics.com/community)

1% FOR THE PLANET

1% for the Planet is a global network of businesses committed to protecting the Earth's resources for future generations. Members like Zeal Optics, New Belgium, Patagonia and more than 2,000 others donate 1% of gross sales to high-impact nonprofit partners that align with their values. At Zeal, we focus our contributions on the organizations you see here along with other groups that are committed to preserving our natural resources.

ADAPTIVE ADVENTURES

Dedicated to connecting disabled individuals to outdoor sports, Adaptive Adventures finds ways to allow people to reignite their passion for adventure and exploration in the outdoor world.

DZI FOUNDATION

Passionate about giving back to Himalayan communities, dZi focuses on reducing poverty and improving the quality of life in some of the most remote communities in Nepal.

HIGH FIVES FOUNDATION

The High Fives Foundation supports the dreams of outdoor sports athletes by raising injury prevention awareness while providing resources and inspiration to those who suffer life-altering injuries.

THE LATITUDE PROJECT

Motivated by a lifetime of travel, the founders of The Latitude Project work to create stronger communities by providing service project opportunities in some of the world's most premier surf destinations located in developing countries.

NATIONAL FOREST FOUNDATION

The National Forest Foundation promotes the enhancement and public enjoyment of the 193-million-acre U.S. National Forest Service.

PLASTIC BANK

British Columbia's Plastic Bank is helping the world stop ocean plastic while improving the lives of collector communities. Plastic Bank builds ethical recycling ecosystems in coastal communities and reprocesses the materials for reintroduction into the global manufacturing supply chain.

PROTECT OUR WINTERS (POW)

POW's mission is to mobilize the winter sports community to lead the fight against climate change; focusing on education initiatives, advocacy, and supporting community-based projects.

SOS OUTREACH

SOS was founded in 1993 in the Vail Valley of Colorado. This program provides risk prevention, outdoor recreation, and environmental education to Colorado's youth.

ZEAL OPTICS LENS TECHNOLOGIES

WE KNOW

O P T

Bluebird days are great, but we live for the deepest, snowy days. We spend every moment that we're not testing our products working to improve them to make those days magical. We believe goggles should be the last thing you're thinking about on the mountain because they work in every condition. At the heart of everything we do is our lens technology, which comes in three levels, each building off the other. Our team of product developers and Ambassadors have put every lens through the wringer and this year's collection is our best yet. We hope you have the chance to give them a try, and trust you'll agree.

CLEARLY SUPERIOR

Optimum

This collection is named Optimum for a reason—well actually a whole bunch of them. The foundation of all Zeal Optics lens collections, Optimum is built with complete protection from harmful UV rays, our unreal Everclear Anti-Fog, Permashield Hardcoat and optimal color filtration for perfect clarity, heightened color and enhanced definition. Available in a range of mirrors and tints, Optimum has you covered no matter what Mother Nature serves up.

LENS FEATURES

- Permashield Hardcoat
- Everclear Anti-Fog
- Color Filtration
- Blocks 100% UVA/B/C Rays
- Hydro/Oleophobic

LENS TECHNOLOGIES

Everclear Anti-Fog
STANDARD FEATURE

Everclear Anti-Fog is a hydrophilic infusion which can't be wiped off. It dissipates moisture by flattening the water contact angle and maximizing surface energy to prevent condensation buildups, ensuring clear vision no matter the condition. Everclear Anti-Fog resists fogging for more than 220 seconds, double the industry standard.

Color Filtration
STANDARD FEATURE

Short wave blue light reduction is a standard feature of all Zeal Optics lenses. Blue light distorts color and by filtering it out, you are able to see pure, vivid colors with greater clarity and detail.

UV Protection
STANDARD FEATURE

All Zeal Optics lenses block 100% UVA/B/C rays for increased protection. Optimum Polarized and Optimum Polarized Automatic+ also block 95% of HEV light, the leading cause of macular degeneration and long term eye damage.

Permashield Hardcoat
STANDARD FEATURE

To resist scratches on the surface of the lens, we apply our clear optical grade Permashield Hardcoat. It bonds to the polycarbonate and is UV cured for greater adhesion and prolonged protection of the lens.

Hydro/Oleo
STANDARD FEATURE

We apply a Hydro- and Oleophobic coating to prevent moisture, oil and fingerprints from adhering to the lens. This steepens the contact angle to 90° so water and oil bead off the lens instead of dispersing across the surface. This coating is applied via vacuum deposition rather than immersion, eliminating distortion on the front side of the lens.

Super Hydro/Oleo

Super Hydro/Oleo comes with Optimum Polarized and Optimum Polarized Automatic+ and has a contact angle of 115°.

Spherical Lens
AVAILABLE IN PORTAL XL, PORTAL, HEMISPHERE & NOMAD

Our spherical polycarbonate lens curves both vertically and horizontally to enhance peripheral vision. This increased volume creates less distortion and even stress dispersion to help reduce glare and fogging.

Cylindrical lens
AVAILABLE IN LOOKOUT & BEACON

Our cylindrical polycarbonate lens is flatter and has a lower profile than our spherical lens. The lens curves horizontally while remaining flat vertically allowing for a closer fit. It is digitally optically tapered in thickness to reduce distortion and provide similar optics to a spherical lens.

CLARITY + PROTECTION

Optimum Polarized

Our Optimum Polarized Collection has all the color, clarity and contrast of Optimum, with the added bonus of polarized protection for a glare-free view. Our Japanese-made, premium polarized lens is designed to block reflected light and filter 95% of HEV light to deliver the ultimate color experience and exceptional definition and contrast of the snow's surface, all while reducing eye fatigue and the risk of long-term eye damage.

LENS FEATURES

- △ Permashield Hardcoat
- △ Everclear Anti-Fog
- △ Color Filtration
- △ Blocks 100% UVA/B/C Rays
- △ Hydro/Oleophobic
- △ 95%+ Polarized Efficiency
- △ Cuts Glare & Reflected Light
- △ Blocks 95% HEV Light
- △ Reduces Risk of Long Term Eye Damage
- △ Protects from Eye Fatigue
- △ Heightened Color, Definition & Detail

**POLARIZED + PHOTOCROMIC**

Optimum Polarized Automatic+

Yup, it's true: We took the best of the best and made it even better. It's so good you'll never have to change your lens again. Why? Because Automatic+ lenses have all the features of our Optimum and Polarized Collections + photochromic technology, so your lens automatically adjusts color and tint in changing light conditions, delivering an unsurpassed optical experience for all-day performance in a single lens. One lens, every condition.

OBSERVATION DECK TECHNOLOGY

Change Your Perspective

Taking a page from the physics behind structures like air traffic control towers, Observation Deck Technology (ODT) is the first goggle system that replicates the eagle's view of the mountains, to help you see every inch of the line below you.

Available in Lookout and Beacon

Traditional Goggle

Observation Deck Technology

INCREASES VERTICAL PERIPHERAL BY 20%

RAIL LOCK SYSTEM

Guide. Slide. Lock.

Our patented //Rail Lock System (RLs) collection features a rimless frame design for unsurpassed peripheral vision and a dual sliding rail system that guides, slides, and locks your lens in place anywhere on the mountain.

Available in Lookout, Portal XL and Portal

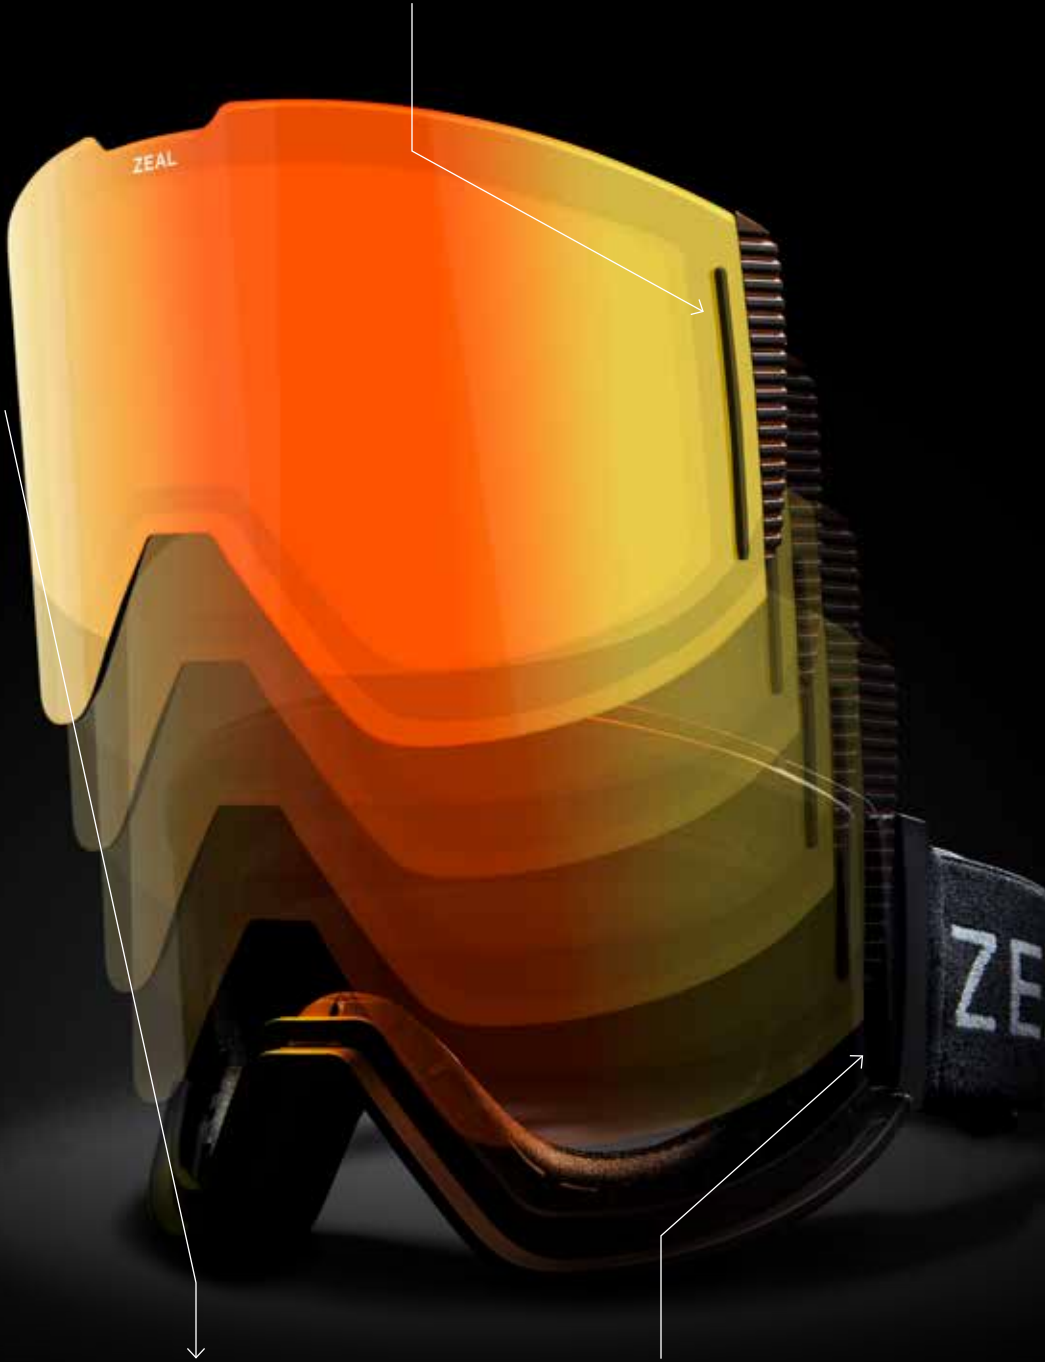

HELMET COMPATIBILITY & VENTING
We design all of our frames with neutral brow lines for nearly universal helmet compatibility, making gaper gaps a thing of the past. The upper venting includes a proprietary wicking foam that allows the goggles to breathe, even when paired snugly with your helmet for a fog-free view.

SEE WHAT'S NEXT
With **ODT**, we've removed most of the frame material at the bottom of the goggle (but kept the venting) to let the lens sit closer to your face and tilt out as it rises. This allows you to see more of the line below you, 20% in fact, and focus on what's coming your way. The canted lens also eliminates reflections off your face from incoming light.

GUIDE. SLIDE. LOCK.
Changing lenses has never been easier with our dual sliding rail system, **RLs**, that guides and slides lenses easily onto the frame while a magnetic closure locks your lens into place ensuring a simple and secure lens swap. Featuring a rimless frame design for unsurpassed peripheral vision while skiing, snowboarding or snowmobiling.

Frame Features

Venting
STANDARD FEATURE
Upper and lower venting and wicking fabrics regulate interior airflow and ensure fogging is kept at bay.

Dual Strap System
STANDARD FEATURE
Comfort, simplicity and adjustability are key components in finding the perfect goggle. Our dual strap system helps you find your perfect fit every time.

Over the Glass
LOOKOUT, BEACON, PORTAL XL, HEMISPHERE
We believe you should never sacrifice performance for style. The same is true if you wear glasses while riding. We crafted the simplest, most effective OTG system to date, with style and performance built into one functional piece.

No Slip Grip
STANDARD FEATURE
A beaded silicon coating on every strap ensures that whether wearing a helmet or beanie, your goggle will stay exactly where you place it.

Triple Layer Face Foam
STANDARD FEATURE
Our plush triple layer face foam offers a perfect fit for all day comfort and protection from the elements.

Rx Insert
Our universal prescription insert fits securely inside any Zeal Optics frame, keeping your prescription in place and optically aligned.

INTRODUCING THE

L O O K O U T

Good friends and deep powder. Bluebird days and steep chutes. First chair and no lines. When you put the best parts of the season together, sometimes one plus one really does equal three. For winter '21/22, Zeal Optics has united its patented //Rail Lock System, the simplest, most secure way to change your goggle lens, with its award-winning Observation Deck Technology, which expands your vertical field of view by 20%, in the revolutionary new Lookout to elevate what a goggle can be. When you add Zeal to your winter, your perspective gets a whole lot bigger. And better.

INSPIRED

ELEMENTS

C O L L E C T

The world around us inspires and shapes us. Its lines and forms are the purest expressions of art, enthusing our imagination. At the heart of this are the elements that shape the mountains, making every day and run a unique playground to study and stimulate. This year we worked with four nature photographers to capture a sense of the wonder and awe of those elements that elevate our perspective as we wander through the world.

- Arctic**
At the heart of every winter lies the transformative powers of ice. Whether expanding and shattering, or drifting effortlessly above our heads, each crystal adds to the story.
- Canyon**
At the heart of the mountain's endless cycle of uplift and erosion, the stone beneath our feet forms the lines and shapes of endless wonder of the eons.
- Tidal**
While stone may feel enduring, the seasons' rush of water reigns supreme, crafting the form of every mountain landscape and shaping the canyons and environments that interconnect it all.
- Timber**
Mixed within the seeming permanence of stone, the ephemeral forms of plants and trees brings life and shelter to the seasons of the mountains.

TOGETHER SEEKING SOLITUDE

THE

C O L L A B O R A T I O N

The NFF promotes the enhancement and public enjoyment of the 193-million-acred National Forest System. Zeal Optics works to support them through programs like our annual “Buy A Zeal, Plant A Tree” promotion to help plant thousands of trees in impacted portions of our National Forests. These public lands belong to all of us and are our year-round playgrounds.

The Backwoods Fellowship

We come to the forests to find solace. To explore. To seek inspiration from new lines and the rejuvenation of nature. In addition to being an endless canvas for winter fun, our forests are increasingly under pressure from growing populations and climate change.

In a joint effort of stewardship, Zeal and Weston Backcountry have teamed up with artist John Fellows and the National Forest Foundation to breathe life back into the open spaces that provide us with peace of mind and an outlet for adventure.

FOR ‘21/22 WE ARE PROUD TO ANNOUNCE THE BACKWOODS FELLOWSHIP COLLABORATION TO RAISE AWARENESS AROUND THE PLIGHTS OF OUR PUBLIC LANDS AND RAISE FUNDS TO HELP RESTORE AREAS THAT HAVE BEEN DESTROYED BY WILDFIRES IN OUR NATIONAL FORESTS.

The Artist

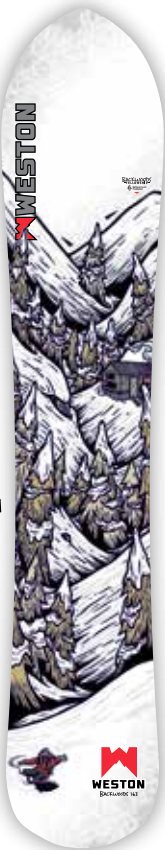

Colorado-based artist John Fellows’ signature “contemporary folk” style weaves together layers to create an old time, hands-on feel. He creates unique linoleum carving collages that reflect his personal experiences and love of the mountains that inspire him.

The Goggle Strap

John Fellows’ art shapes the design of four SKUs available in Lookout and Beacon. For every purchase of these goggles, Zeal will plant five trees in our National Forests. Each of these limited-edition goggles include custom packaging, goggle bags and a Backwoods Fellowship sticker.

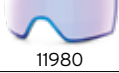

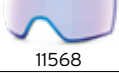

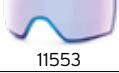

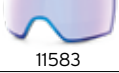

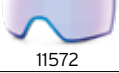

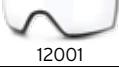

The Snowboard & Ski

Weston and Zeal share a common passion for backcountry lines in our National Forests and have worked closely together for years. This partnership rises to the next level with the Backwoods Fellowship, including Fellows’ art on the new Backwoods snowboard and Grizzly ski.

ACCESSORY LENSES

Enhance your experience with accessory lens options for all Zeal Optics goggles and every condition.
