

ZEAL

OPTICS

'22/23 *Snow*

Vertical perspectives since '97

THAT MOMENT before you drop into a new line is always a mix of excitement, anticipation, reflection and a tiny bit of fear. It's what you do to prepare that helps change that last bit to confidence.

Over the last year, our Ambassadors and R&D team have spent countless hours in the mountains dissecting every aspect of our goggle program to prepare for this launch.

As we come into what we hope will be a more normal winter, full of riding and traveling with friends, we've enhanced every goggle and lens, made our packaging and production more sustainable and created two groundbreaking new styles to help you see and prepare for every run ahead. In any condition.

This winter, get ready to drop into new mountains, perspectives, adventures and lines through our lenses. Get ready to drop into better.

we are all zeal

Zeal is defined as passion, and our passion for winter defines the Zeal family. To help us continually push the limits of our goggles’ optics, we work with a dedicated team of powder purists to test our gear under the harshest conditions, day in and day out. To constantly elevate our products and help solve problems you never knew you had. We hope to see you out there this winter testing your Zeals and would love to hear your thoughts on social media - @zealoptics.

MEET THE ZEAL FAMILY AT ZEALOPTICS.COM/AMBASSADORS

connect + protect

As a company inspired by the natural world around us, we understand the importance of protecting and sustaining the planet for generations to come. We do this through some amazing projects and partnerships that reduce our footprint, spark social change and create better memories of our time outdoors.

In addition to our 1% for the Planet membership, we are constantly working to reduce the footprint of our products and practices. Here are some of the steps we're taking to make our goggles more eco-friendly:

NEW SORONA STRAPS: Sorona is a renewably sourced bio-based yarn that uses fermentation instead of chemical synthesis in its bonding, requiring 40% less energy and reducing greenhouse gas emissions by 56% compared to nylon.

NEW ELIMINATION OF ALL PLASTIC IN PACKAGING: Our goggles come in boxes made from FSC-Certified paper and are now packed with a pulp mold insert (think egg cartons) that eliminates the need for any foam or plastic. The entire package can be recycled as is!

NEW ENVIROBOARD: Starting with the '21-22 season, Zeal will be using Enviro Board on all in-case materials. Enviro Board converts agricultural waste fiber such as rice straw, wheat straw, elephant grass, and sugar cane into environmentally friendly building panels.

ECO-FOCUSED FACTORY: Our goggle factory is focused on constant improvement to reduce its footprint which includes using solar energy to power operations and recycling all fluids, water and excess frame materials from production.

1% FOR THE PLANET

1% for the Planet is a global network of businesses committed to protecting the Earth's resources for future generations. Members like Zeal Optics, New Belgium, Patagonia and more than 2,000 others donate 1% of gross sales to high-impact nonprofit partners that align with their values. At Zeal, we focus our contributions on the organizations you see here along with other groups that are dedicated to preserving our natural resources.

ADAPTIVE ADVENTURES

Dedicated to connecting disabled individuals to outdoor sports, Adaptive Adventures finds ways to allow people to reignite their passion for adventure and exploration in the outdoor world.

HIGH FIVES FOUNDATION

A non-profit that supports the dreams of outdoor sports athletes by raising injury prevention awareness while providing resources and inspiration to those who suffer life-altering injuries.

NATIONAL FOREST FOUNDATION

This foundation promotes the enhancement and public enjoyment of the U.S. National Forest Service's 193 million acres.

PLASTIC OCEANS INTERNATIONAL

A US-based non-profit organization working to end plastic pollution and to foster sustainable communities worldwide. They operate with the belief that we can and must act at the local level in order to create change on a global scale. Zeal works with Plastic Oceans during Earth Month for "Shades For Seas", an annual program that helps clean our oceans and coastlines.

PROTECT OUR WINTERS (POW)

POW's mission is to mobilize the winter sports community to lead the fight against climate change; focusing on education initiatives, advocacy, and supporting community-based projects.

SOS OUTREACH

Founded in 1993 in the Vail Valley of Colorado, this program provides risk prevention, outdoor recreation, and environmental education to Colorado's youth.

TREE CANADA

Dedicated to planting and nurturing trees in rural and urban environments, Tree Canada helps restore tree cover in areas hit by natural disasters, guides communities in managing their urban forests and has helped green nearly 700 schoolyards. To date, with community partners and sponsors like Zeal, they've planted more than 82 million trees across Canada.

VERMONT ADAPTIVE SKI & SPORTS

A nationally-recognized organization that empowers people of all abilities through inclusive sports and recreational programming. In addition to sports, Zeal helps support their programming options which integrate environmental, holistic wellness and competitive training philosophies for people of all ages with cognitive, developmental, physical and emotional disabilities.

We know optics

DROP INTO *Technology*

At Zeal Optics, everything we do begins and ends with optical quality. We’re constantly striving to improve our lenses to help you see more of the mountain. As a proud part of the Maui Jim family, Zeal has unrivaled access to the latest materials and technology developments, as well as the top suppliers in the world. At the heart of our goggle line, where the sintered base meets the snow, are our three lens collections: Optimum, Optimum Polarized and Optimum Polarized Automatic+. These collections are designed to make mind-blowing technologies easy to understand and provide a “Great, Better, Best” approach.

optimum

CLEARLY SUPERIOR

optimum

This collection is named Optimum for a reason—well actually a whole bunch of them. The foundation of all Zeal Optics lens collections, Optimum is built with complete protection from harmful UV rays, our unreal Everclear Anti-Fog, Permashield Hardcoat and optimal color filtration for perfect clarity, heightened color and enhanced definition. Available in a range of mirrors and tints, Optimum has you covered no matter what Mother Nature serves up.

LENS FEATURES

- △ Permashield Hardcoat
- △ Everclear Anti-Fog
- △ Color Filtration
- △ Blocks 100% UVA/B/C Rays
- △ Hydro/Oleophobic

lens technologies

- 

everclear anti-fog
STANDARD FEATURE
Everclear Anti-Fog is a hydrophilic infusion which can't be wiped off. It dissipates moisture by flattening the water contact angle and maximizing surface energy to prevent condensation buildups, ensuring clear vision no matter the condition. Everclear Anti-Fog resists fogging for more than 220 seconds, ten times the industry standard.
- 

color filtration
STANDARD FEATURE
Short wave blue light reduction is a standard feature of all Zeal Optics lenses. Blue light distorts color and by filtering it out, you are able to see pure, vivid colors with greater clarity and detail.
- 

UV protection
STANDARD FEATURE
All Zeal Optics lenses block 100% UVA/B/C rays for increased protection. Optimum Polarized and Optimum Polarized Automatic+ also block 95% of HEV light, the leading cause of macular degeneration and long-term eye damage.
- 

permashield hardcoat
STANDARD FEATURE
To resist scratches on the surface of the lens, we apply our clear optical grade Permashield Hardcoat. It bonds to the polycarbonate and is UV cured for greater adhesion and prolonged protection of the lens.
- 

hydro/oleo
STANDARD FEATURE
We apply a Hydro- and Oleophobic coating to prevent moisture, oil and fingerprints from adhering to the lens. This steepens the contact angle to 90° so water and oil bead off the lens instead of dispersing across the surface. This coating is applied via vacuum deposition rather than immersion, eliminating distortion on the front side of the lens.
- 

super hydro/oleo
Super Hydro/Oleo comes with Optimum Polarized and Optimum Polarized Automatic+ and boasts a contact angle of 115°.
- 

spherical lens
AVAILABLE IN HANGFIRE, HIGHMARK, PORTAL XL, PORTAL, HEMISPHERE & NOMAD
Our spherical polycarbonate lens curves both vertically and horizontally. By mimicking the shape of the eye, it helps reduce optical distortion. The increased volume also enhances peripheral vision and stress dispersion to reduce glare and fogging.
- 

cylindrical lens
AVAILABLE IN LOOKOUT & BEACON
Our cylindrical polycarbonate lens is flatter and has a lower profile than our spherical lens. The lens curves horizontally while remaining flat vertically allowing for a closer fit. It is digitally optically tapered in thickness to reduce distortion and provide similar optics to a spherical lens.

REFLECTED LIGHT TRAVELS
HORIZONTALLY CREATING
INTENSE, HARSH LIGHT WE
KNOW AS GLARE

OPTIMUM POLARIZED
ELIMINATES GLARE WHILE
HIGHLIGHTING ICE & HARDPACK

CLARITY + PROTECTION

optimum polarized

Our Optimum Polarized Collection has all the color, clarity and contrast of Optimum, with the added bonus of polarized protection for a glare-free view of the terrain while highlighting ice and hardpack. Our Japanese-made, premium polarized lens is designed to block reflected light and filter 95% of HEV light. This delivers the ultimate color experience and exceptional definition and contrast of the snow's surface, all while reducing eye fatigue and the risk of long-term eye damage.

LENS FEATURES

- △ Permashield Hardcoat
- △ Everclear Anti-Fog
- △ Color Filtration
- △ Blocks 100% UVA/B/C Rays
- △ Hydro/Oleophobic
- △ 95%+ Polarized Efficiency
- △ Cuts Glare & Reflected Light
- △ Blocks 95% HEV Light
- △ Reduces Risk of Long Term Eye Damage
- △ Protects from Eye Fatigue
- △ Heightened Color, Definition & Detail
- △ Super Hydro/Oleo
- △ Highlights Ice & Hardpack

POLARIZED + PHOTOCROMIC

optimum polarized automatic+

Yup, it's true: We took the best of the best and made it even better. It's so good you'll never have to change your lens again. Why? Because Automatic+ lenses have all the features of our Optimum and Polarized Collections + photochromic technology, so your lens automatically adjusts color and tint in changing light conditions, delivering an unsurpassed optical experience for all-day performance in a single lens. One lens, every condition.

GUIDE. SLIDE. LOCK.
Changing lenses has never been easier! //RLs's dual-sliding rail system, guides and slides lenses easily onto the frame while a magnetic closure locks your lens into place, ensuring a simple and secure lens swap. Featuring a rimless frame design for unsurpassed peripheral vision while skiing, snowboarding or snowmobiling.

RAIL LOCK //SYSTEM

GUIDE. SLIDE. LOCK.

Our patented //RLs collection features a rimless frame design for unsurpassed peripheral vision and a dual sliding rail system that guides, slides, and locks your lens in place anywhere on the mountain.

AVAILABLE IN HIGHMARK, LOOKOUT, PORTAL XL AND PORTAL

OBSERVATION DECK TECHNOLOGY

CHANGE YOUR PERSPECTIVE

Taking a page from the physics behind structures like air traffic control towers, Observation Deck Technology (ODT) is the first goggle system that replicates the eagle's view of the mountains, to help you see every inch of the line below you.

AVAILABLE IN HANGFIRE, LOOKOUT AND BEACON

SEE WHAT'S NEXT
With **ODT**, we've removed most of the frame material at the bottom of the goggle (but kept the venting) to let the lens sit closer to your face and tilt out as it rises. This allows you to see more of the line below you, 20% in fact, and focus on what's coming your way. The canted lens also eliminates reflections on your inner lens from incoming light.

frame features

- venting**
STANDARD FEATURE

Upper and lower venting and wicking fabrics regulate interior airflow and ensure fogging is kept at bay.
- dual-strap system**
STANDARD FEATURE

Comfort, simplicity and adjustability are key components in finding the perfect goggle. Our Dual-strap system helps you find your optimal fit every time.
- over the glass ready**
HANGFIRE, HIGHMARK, LOOKOUT, BEACON, PORTAL XL, HEMISPHERE

We believe you should never sacrifice performance for style. The same is true if you wear glasses while riding. We crafted the simplest, most effective OTG system to date, with style and performance built into a simple, functional design.
- no slip grip**
STANDARD FEATURE

A beaded silicon coating on every strap ensures that whether wearing a helmet or beanie, your goggle will stay exactly where you place it.
- triple-layer face foam**
STANDARD FEATURE

Our plush Triple-layer face foam offers a perfect fit for all-day comfort and protection from the elements.

Rx Insert
Our universal prescription insert fits securely inside Zeal Optics' goggle frames (and just about any other brand's), keeping your prescription in place and optically aligned.

SKU 10134

INTRODUCING *Hangfire* .

THE REVOLUTION CONTINUES

The Observation Deck Technology roster just got a lot deeper. For '22/23, Zeal introduces Hangfire, the first spherical goggle to join the ODT family. Combining the optical technology of spherical lenses, which mimic the eye's shape to minimize distortion, with ODT's award winning pantoscopic-tilt design, allowing you to see 20% more of the slope below you, the mountains just got a whole lot bigger. With its sleek rimless design, incredible peripheral and helmet compatibility, Hangfire takes a minimalistic approach to revolutionizing the way you see winter.

WARRANTY INFO

Quality and durability are key components of all Zeal Optics goggles. If you experience a manufacturing defect in material or workmanship, our goggles are warranted for 2 years from the purchase date. Zeal Optics only authorizes warranty claims for the original buyer of products purchased from authorized dealers.

We repair or replace, at our discretion, any Zeal Optics goggle (excludes closeout or discontinued goggles) deemed defective by our in-house repair technicians. This excludes damage caused by improper use or normal wear and tear, like scratched lenses or accidental breakage. Not a warranty repair? No problem. Zeal Optics offers special low-cost repairs and replacement parts to keep your goggles in excellent condition.

Give us a call at 1.888.454.9325 for questions.

CARING FOR YOUR GOGGLES

The best way to clean your goggles is to gently wipe the surface of the lens with the interior of the protective bag provided. DO NOT soak or submerge the lens. Do not use cleaning solutions or chemicals.

After using your goggles, put them in a dry, well ventilated location to allow all moisture to evaporate before returning them into the microfiber protective bag included in the package. Always store your dry goggles in the goggle bag between uses.
