

THE VIEW FROM HERE

'26 / 27 snow

BC BACKCOUNTRY | CANADA
📍 50.1162° N, 122.9535° W

THE VIEW FROM HERE

PREPARE TO EMBARK
ON AN UNPARALLELED JOURNEY
INTO THE HEART OF WINTER.

MARBLE, CO | UNITED STATES
📍 39.0722° N, 107.1889° W

FOR WINTER '26/'27, we're unleashing "The View From Here," a campaign that rips through the ordinary and plunges you into the extraordinary. This isn't just about goggles; it's about chasing the untamed spirit of adventure, pursuing legendary snowfalls across continents, and dropping into uncharted territory on skis and snowboards.

Our unrivaled Optimum series of goggle lenses aren't just a window; they're a portal to epic. Transforming every blinding whiteout into a vivid landscape with unrivaled contrast and every steep descent into a cinematic masterpiece. You won't just see the mountain; you'll feel it, alive with detail and clarity that defies expectation.

And for those critical moments when light shifts and conditions demand instant adaptation, we bring you the revolutionary new Slide Lock System. This isn't just a new way to change lenses; it's the evolution of speed, security and unwavering confidence. Snap new lenses securely into place in a flash, even with your helmet on, and stay locked into the flow of your adventure. The mountain won't wait, and neither should you.

"The View From Here" is your invitation to carve a new path, to redefine what's possible, and to witness the world's most epic landscapes through a lens like no other. We hope to see you out there.

REDUCE. GOGGLES REUSE. DONE RE-SHRED. DIFFERENTLY

PATAGONIA | ARGENTINA
41.1334° S, 71.3102° W

IN OUR COMMITMENT
to reduce the footprint
of every product we make,
Zeal Optics goggle frames
are made from 100%
recycled TPU and PC/ABS
and our straps and goggle
bags contain a minimum
of 70% recycled PET.

**RECYCLED PET GOGGLE STRAPS
& BAGS:** Zeal's straps and goggle
bags are made from a minimum of
70% recycled PET.

**RECYCLED TPU & PC/ABS
GOGGLE FRAMES:** The softer
portions of our goggle frames are made
from 100% recycled TPU, a common
ingredient in footwear. The harder
materials in our Rail Lock and Slide
Lock System frames are constructed
from 100% recycled PC/ABS, which
is commonly used in electronics.

**ELIMINATION OF PLASTIC
IN PACKAGING WHEREVER
POSSIBLE:** Our goggles come
in paper boxes and packed with
a pulp mold insert (think egg
cartons) that eliminates the need
for any foam. The entire package
can be recycled as is!

**FSC-CERTIFIED MARKETING
& PACKAGING:** All Zeal printed
materials, including our catalog
and in-store cards, utilize FSC-
certified paper.

AS A COMPANY INSPIRED
by the natural world around
us, we understand the
importance of protecting
and sustaining the planet
for generations to come.
We do this through some
amazing projects and
partnerships to spark
social change and create
better memories of our
time outdoors.

WE ALPINISTS ARE SKIERS ALL SNOWBOARDERS ZEAL ADVENTURERS

WHISTLER, BC | CANADA
50.1162° N, 122.9535° W

ZEAL, BY DEFINITION, means passion, and our passion for winter defines the Zeal family. To help us continually push the limits of our goggles' optics, we work with a dedicated team of powder purists to test our gear under the harshest conditions, day in and day out. Our Ambassadors constantly elevate our products and help solve problems you never knew you had. We hope to see you out there this winter testing your Zeals and would love to hear your thoughts on social media - @zealoptics.

LENS TECHNOLOGIES

BLUEBIRD DAYS ARE GREAT, but we live for the deepest, snowiest days. We spend every moment that we're not testing our products working to improve them to make those days magical. We believe goggles should be the last thing you're thinking about on the mountain because they work in every condition, helping you look good, ride well and see clearly.

At the heart of everything we do is our Optimum lens technology, which comes in three levels, each building off the other.

STANDARD FEATURES

Optimum Color Filtration

Short wave blue light reduction is a standard feature of all Zeal Optics lenses. Blue light distorts color and, by filtering it out, you are able to see **pure, vivid colors with greater clarity and detail.**

Everclear Anti-fog

Everclear Anti-Fog is a hydrophilic infusion which can't be wiped off. It dissipates moisture by flattening the water contact angle and maximizing surface energy to prevent condensation buildups, ensuring clear vision no matter the condition. **Everclear Anti-Fog resists fogging for more than 200 seconds, more than 10 times the industry standard.**

UV Protection

All Zeal Optics lenses block 100% of UVA/B rays for superior sun protection. Optimum Polarized and Optimum Polarized Automatic+ also block HEV light, a cause of macular degeneration and long-term eye damage.

Permashield Hardcoat

To resist scratches on the surface of the lens, we apply our clear, optical grade Permashield Hardcoat. It bonds to the polycarbonate and is UV cured for greater adhesion and **prolonged protection of the lens.**

Hydro/Oleo

We apply a Hydro- and Oleophobic coating to our mirrored lenses to **prevent moisture, oil and fingerprints from adhering to the lens.** This steepens the contact angle to 90° so water and oil bead off the lens instead of dispersing across the surface. This coating is applied via vacuum deposition rather than immersion, eliminating distortion on the front side of the lens.

Super Hydro/Oleo

Super Hydro/Oleo utilizes a contact angle of 115° for superior moisture distribution. This coating comes standard on all mirrored Optimum Polarized lenses.

Spherical Lens

AVAILABLE IN STORMVEIL, CLOUDFALL XL, CLOUDFALL, HANGFIRE, HIGHMARK, HEMISPHERE & NOMAD

Our spherical polycarbonate lens curves both vertically and horizontally. By mimicking the shape of the eye, it helps reduce optical distortion. The increased volume also enhances peripheral vision and stress dispersion to reduce glare and fogging.

Cylindrical Lens

AVAILABLE IN MERIDIAN, LOOKOUT, & BEACON

Our cylindrical polycarbonate lens is flatter and has a lower profile than our spherical lens. The lens curves horizontally while remaining flat vertically allowing for a closer fit. It is digitally optically tapered in thickness to reduce distortion and provide similar optics to a spherical lens.

Rx INSERT

Rx Insert

Our universal prescription insert fits securely inside almost all of Zeal Optics' goggle frames (and just about any other brand's), keeping your prescription in place and optically aligned. **SKU 10134**

NOT ALL LENSES
ARE CREATED EQUAL

OPTIMUM

This lens is named Optimum for a reason – well, with a mountain of tech in every lens, a whole bunch of reasons. Optimum Color Filtration for unrivaled contrast, mind-blowing natural color and next-level clarity. Industry-leading Everclear Anti-Fog, that never wipes off. 100% protection from harmful UV rays. Optical grade hardcoat and hydrophobic and oleophobic coatings, to name a few.

**WITHOUT
COLOR
FILTRATION**

Your eyes struggle to perceive overlapping wavelengths of blues, greens and reds; **causing color confusion** where these wavelengths overlap

**WITH
ZEAL OPTIMUM
LENSES**

Zeal Optimum lenses filter out these overlapping wavelengths so colors vibrantly pop, **providing perfect clarity** and contrast for every line

optimum color filtration

FRAME TECHNOLOGIES

RAIL LOCK //SYSTEM

GUIDE. SLIDE. **LOCK.**

Changing lenses has never been easier! Our patented* //RLs' dual-sliding rail system guides and slides lenses easily onto the frame while a magnetic closure locks your lens into place, ensuring a simple and secure lens swap anywhere on the mountain. Zeal's //RLs goggles feature rimless frame designs for unsurpassed peripheral vision while skiing, snowboarding or snowmobiling.

AVAILABLE IN MERIDIAN, CLOUDFALL XL, CLOUDFALL, LOOKOUT AND HIGHMARK

*US Patent. No. 10,456,299 B2; US Patent. No. 2018/0168865 A1

FRAME TECHNOLOGIES

CHANGE YOUR PERSPECTIVE

Taking a page from the physics behind structures like air traffic control towers, Observation Deck Technology (ODT) is the first goggle system that replicates the eagle's view of the mountains, to help you see every inch of the line below you with zero distortion.

AVAILABLE IN STORMVEIL, MERIDIAN, CLOUDFALL XL, CLOUDFALL, LOOKOUT, HANGFIRE AND BEACON

With ODT, we've removed most of the frame material at the bottom of the goggle (but kept the venting) to let the lens sit closer to your face and tilt out as it rises. This allows you to see more of the line below you, and focus on what's coming your way. The canted lens also eliminates reflections on your inner lens from incoming light.

Increases
vertical
peripheral
field of view
with zero
distortion

FRAME FEATURES

VENTING STANDARD FEATURE

Upper and lower venting and wicking fabrics regulate interior airflow and ensure fogging is kept at bay.

DUAL-STRAP SYSTEM STANDARD FEATURE

Comfort, simplicity and adjustability are key components in finding the perfect goggle. Our dual-strap system helps you find your optimal fit every time, with or without a helmet.

OVER THE GLASS READY STORMVEIL, MERIDIAN, CLOUDFALL XL, HANGFIRE, HIGHMARK, LOOKOUT, BEACON, CLOUDFALL, HEMISPHERE

We believe you should never sacrifice performance for style. The same is true if you wear glasses while riding. We crafted the simplest, most effective OTG system to date, with style and performance built into a simple, functional design.

NO SLIP GRIP STANDARD FEATURE

A beaded silicon coating on every strap ensures that whether wearing a helmet or beanie, your goggle will stay exactly where you place it.

TRIPLE-LAYER FACE FOAM STANDARD FEATURE

Our plush triple-layer face foam offers a perfect fit for all-day comfort and protection from the elements.

FRAME TECHNOLOGIES

INTRODUCING

slide
Lock SYSTEM

SNAP. SLIDE. RIDE.

Slide Lock is the ultimate lens swap solution. Drawing on our award-winning //RLs, Rail Lock System's patented lens change, Zeal's new Slide Lock System has once again rewritten the script. We've engineered the ultimate in speed, security, and convenience; allowing you to adapt to changing light and conditions anywhere, anytime.

AVAILABLE IN STORMVEIL

At the heart of the Slide Lock System is a powerful combination of innovation and intuition.

A simple slide release on the bottom of the goggle frame is all it takes to unlock and release your lens. To swap it out, an array of precisely placed magnets effortlessly guides and attaches your secondary lens to the frame. The result? A lightning-fast, incredibly secure connection that you can trust, run after run.

Whether you're adjusting to shifting light at the lodge or swapping lenses on the lift, the Slide Lock System makes it effortless — even with your gloves on and helmet strapped. The Slide Lock System ensures your focus stays on the snow and not on your gear so you can tackle any objective or run with confidence.

**Patent Pending*

FEATURING

STORMVEIL

A NEW DAY DAWNS

GET READY TO ELEVATE YOUR VISION

with our groundbreaking new goggle, the Stormveil. Meticulously designed for a small to medium fit, the Stormveil features the revolutionary Slide Lock System — the standard for rapid, secure lens interchanges. This isn't just an upgrade; it's the evolution of how you see the mountain.

Designed for those who demand uncompromising performance and seamless adaptability, the Stormveil offers an expansive field of view and the optics that only Zeal's Optimum series of lenses can provide, ensuring every detail of your descent is rendered with breathtaking clarity. Experience the next generation of goggle technology and unlock "The View From Here" like never before.

WARRANTY INFO

Quality and durability are key components of all Zeal Optics goggles. If you experience a manufacturing defect in material or workmanship, our goggles are warranted for 2 years from the purchase date. Zeal Optics only authorizes warranty claims for the original buyer of products purchased from authorized dealers. We repair or replace, at our discretion, any Zeal Optics goggle (excludes closeout or discontinued goggles) deemed defective by

our in-house repair technicians. This excludes damage caused by improper use or normal wear and tear, like scratched lenses or accidental breakage. Not a warranty repair? No problem. Zeal Optics offers special low-cost repairs and replacement parts to keep your goggles in excellent condition.

Give us a call at 1.888.454.9325 for questions.

CUSTOM POP DISPLAY OPTIONS

Below are examples of our '25/26 custom POP display campaign. Please see additional options on Brandfolder and don't hesitate to reach out to your Brand Ambassador with questions.

CARING FOR YOUR GOGGLES

The best way to clean your goggles is to gently wipe the surface of the lens with the interior of the protective bag provided. DO NOT soak or submerge the lens. Do not use cleaning solutions or chemicals.

After using your goggles, put them in a dry, well ventilated location to allow all moisture to evaporate before returning them into the microfiber protective bag included in the package. Always store your dry goggles in the goggle bag between uses.

WE BELIEVE LIFE IS BEST LIVED OUTSIDE AND WE MAKE ADVENTURE-READY EYEWEAR FOR THOSE WHO AGREE.
